

# Attainment Comparison

This report enables you to compare standardised scores from a pupil's tests to the performance of pupils in a group.

Use this report to:

- ✓ make a direct comparison between pupils' scores on two different tests taken within a year or year-on-year
- ✓ see whether a class or cohort is making the expected amount of progress between two tests
- ✓ make attainment comparisons across subjects (e.g. year 5 reading compared with year 5 mathematics)
- ✓ gain an indication of pupil progress and identify pupils that are making less progress compared to their peers.
